

**Dawning on a New Day**

Oh I really don't know and it appears that I never knew  
But when I'm all full of noise & rocks & mud  
I dream about when I danced with you  
Oh I rarely recall and there are times that I can't at all  
But there is something so deep and sound asleep  
That comes alive when I hear you call  
We're like cool water calling, warm rays falling  
New life dawning  
Dawning on a new day  
Cool water calling, warm rays falling  
New life dawning  
Dawning on a new day  
Oh I'm running right now  
Yeah as hard as I've ever run  
But, when I'm over this hill and rested up  
The world will find me another one  
The dreams are always so clear  
And they keep telling me what's with you  
But when I open my eyes and gaze ahead  
You know there's no telling what we'll do  
In this new world I'm gonna get out of hand  
I'm gonna give it a run for the money  
I won't sit I'll stand  
I'm gonna learn how to dance  
You're gonna hear me laugh

**Highway Rain**

Highway rain out my window  
Sea of grain how the wind blows  
Across my face and through my body  
Oh that breeze I think it knows me  
I'm alive, hear me laughing  
Let that rain fall cold and splashing  
To be loved is to be happy  
I think I'm ready for that now  
I've been away too long  
I've got to change it all somehow  
I want to hear a new song  
What about real love?  
Tell me how you really know  
Ever since I was a kid everything I did love  
I seemed to let it go  
So how about real love?  
Maybe we already know  
Oh is it the highway rain, is it anything baby?  
The windy race or the the way I feel maybe  
The dream of love of the real thing waiting here for me yeah  
Highway rain help me make it  
She don't know how to say it  
The sun goes down, it bound to happen  
I know now that love's worth having  
Hold my hand from a distance  
Call my name and I'll be listening  
To be loved is to be happy  
I've been away too long  
I've got to change it all somehow  
I want to hear a new song

**Sunlight**

All of your mysteries, I look in your eyes  
Why do I need answers to love's surprise?  
Fell in love easy, when did we start?  
Well I don't know you but I know your heart  
I walk beside you, I brush your arm  
The sun makes us sleepy like early, early wine

Drinking your kisses, breathing your hair  
When I wake from the dream will you still be there?  
As love grows we both know the world has changed  
Somehow we've been rearranged  
I knew love would come if we just let go  
But love like this I've never known  
Sunlight will find a way  
Moments are passing, shadows on skin  
I hear you laughing, will you call me in?  
Looking out windows, where is this dream?  
Does it feel good to you like love again?  
It's a little bit magic, something like smoke  
I'm a little bit lonely every time you go  
Colors from rainbows scatter like wind  
When I wake from the dream will you come again?

**Light of Love**

There's an ocean out my window, oh the sound of restless waves  
I could breathe this air forever 'cause I feel you in this place  
Never thought I'd live alone by the time I was thirty-three  
Guess I was wrong but that ain't a new thing to me  
I'd rather be right just like anybody else  
But I still have to live with myself  
Well you know I'd rather be lost in love instead of found  
You can see I've followed love all around  
There's something in me that can never get enough  
It's a funny kind of thing, first I'm down then I'm up  
I wish somebody could explain the light of love  
The light of love is somewhere waiting  
Lose the breath you're saving  
Feel like celebrating for love  
I should have known the world was saying  
Raise your head its raining  
Some day boy, you'll see there's enough  
This is some kind of day, I thought it was summer in July  
But so much rain, it's like a cold winter sky  
I'd love it this way if I wasn't here alone  
Have another glass of wine and let her go  
I'm alone ooh, I'm lonely as I hear the seabirds call  
Seven islands sail before me, I guess I'm not alone at all

**Still Believe**

I see the towers of concrete and not a thing that's green  
Below, the coldest snowy ground I've ever seen  
I need a breath of clean air, how can a human breathe?  
How can we live like this and still believe?  
Beyond the frantic city frozen prairie sleeps  
Still alive but trailing lonely dreams  
We're all standing here like fence posts, torn wire between  
How can we live like this and still believe?  
I want to live where there's love and emotion  
Say what I feel with my eyes wide and open  
Dump all the fear in the river, wash it away  
Take all the talk we've been using for cover  
Out of the dark we can love one another  
Dump all the fear in the river wash it away, yeah  
Oh then I find myself floating, dreaming  
Out on the desert the mountains are gleaming  
I feel the sun on the rocks and the warm wind around me  
And you are there warm and humming  
I see your eyes and you knew I was coming  
You say words in your silence I've never spoken  
Cold wind on my shoulders, hat down on my ears  
Winter night that crawls like seven years  
Light spills over laughter, from a tavern it rings

### **Run With Me**

Don't need boundaries, invisible lines  
Don't need nobody saying stay on your side  
The only lines that we ever will need  
All over our faces as we grow old gracefully, yeah  
I have a vision of a memory dream  
Laugh when you're happy, when you're angry you scream  
There isn't time to do anything less  
Than live for this minute so your heart doesn't know emptiness  
You run with me and I'll run with you  
I'm tired of living like there's nothing to do  
You run with me and I'll run away with you  
This ain't a dream, no this is true  
Living life's passion is thrilling and new  
You run with me and I'll run away with you  
I see a window and I want to crawl through  
We get in anyway no matter what we do  
You silly girl don't you want to come too?  
We're lucky together oh I just want to run, me and you  
Oh this magic feeling, letting go, leaving  
Whatever reason, I've got hope  
I never knew it, now I know freedom  
I had it all the time  
Freedom's just a state of mind  
I'll run away with you, will you run with me?

### **Don't Know When**

I've been away, there must be something in the air  
that has called me to stay  
I'm over, the cloudy feeling that I had to get out of the rain  
This summer, it doesn't matter whatever calls out my name  
I'm ready, are you ready? cause after this we'll never be the same  
Getting ready to ride on the wind  
Do you believe we'll ever feel this again?  
I want your weight upon me  
Don't want to be lost and lonely  
I want to wake to find a world we belong in  
Lay all your hair around me  
Then act surprised that you found me  
I'm always going but I don't know when  
I'm on the phone, I hear you breathing  
and I'm off in a world of my own  
For so long, so many reasons, hard to discern  
where the hell I'm going  
I'm rolling, steady rhythm, keeping the pace with a song  
Oh woman, am I dreaming,  
or are you as real as the cloud I'm on?  
Getting ready to ride on the wind  
Do you believe we'll ever feel this again  
Oh fall was on and you were gone  
So much for summer days  
Yeah but the letters come and every one  
Repeats what I used to say

### **Let Us Dream**

Every couple days I recall what you mean to me  
Close my eyes and I do float away  
Friends like you don't fade with time  
We just change the way we will and love each other still  
And share the things that only time will tell  
Every couple days I yearn for the sun to shine  
Lay on that grass with my head on the ground  
Days like these they ease my mind  
Let us just remain at peace and lie here in this place  
And dream of all the roads that we could take  
Every rain cloud isn't there just to fall  
There are mountains unlike mountains at all

And our friendship well it's much more than it seems  
Let us take it and let us dream  
It's been a couple years, now I don't get to see you often  
Feel your wind and I know you're around  
So much love has saved my heart  
I love you every way, it's good to watch you change  
There's some of every season in your ways  
Oh, and no amount of time, no distance down the line  
Could ever take away the love that's in your eyes  
Or the gentle way you always look at mine  
We are every rain cloud, over every mountain  
We are every season and we have every reason  
Let us dream

### **So Long, Garden Dream**

Oh you never love the land the way the land loves you  
Feeding and holding and giving us life  
We cut her and we drink her dry  
leave her bones to the rainless sky  
Earth turns to carrion, no one knows why  
For so long an endless stream, so long Garden Dream  
It's over now unless we open our eyes  
Oh Garden Dream I hope you'll never die  
Let tomorrow rain  
Leave us here to build this life  
And to love this place again  
Everywhere are dying lakes, every man's mistake  
Pouring in poison, drying up love  
I want to lay me down on the pulsing ground  
Earth in my arteries flowing like blood  
For so long an endless stream, so long Garden Dream  
It's over now unless we open our eyes  
Oh what a lonely, lonely, lonely, lovely, lovely light

### **Lover of the World**

Oh the wind does blow out of Denver  
You breathe that smoke and dream of Aspen air  
Where the prairie soil turns into buildings  
Straight and tall they make'em like mountains there  
Oh you won't get burned if you keep on walking  
If you don't mind dirt there's many roads to go  
In the midnight moon I thought I saw an angel  
Settling down around me like falling snow  
Even now nobody knows  
Where this world all began  
Will it stop or will it spin?  
We all sing the seers song  
We pretend we do what's right  
Then ignore the maker's light  
A better lover of the world I want to be  
Oh when I hit the street I'm gonna take my freedom  
I'm gonna fill it up with laughter and with life  
Oh I'll pour that cup till it's flowing over  
Then I'll find a playful woman to be my wife  
Better lovers of the world we're going to be  
I'm gonna head out over yonder, where tomorrow calls my name  
Where the day to day is never quite the same  
Oh I'll give up all my old routines, I've worked them all to death  
Oh and I think it's time to take another breath  
Take it now, take it now, another breath, take it now, take it now  
Oh it is not war and it's not killing  
That keeps up down, we've all been here before  
When we come back we'll all be more willing  
To open up the blossom and be much more  
A better lover of the world I want to be  
Better lovers of the world we're going to be
